SECTION 1

Core Features of the Theme

SECTION 1
Core Features of the Theme

Color Palette and Typography

This theme defines a set of harmonious colors:

- **Primary (dark blue)** for structure and titles.
- **Alert (brick red)** for important warnings.
- **Example (dark cyan)** for illustrative content.

Color Palette and Typography
This theme defines a set of harmonious colors:
- Primary (dark blue) for structure and titles.
- Alert (brick red) for important warnings.
- Example (dark cyan) for illustrative content.

Color Palette and Typography

This theme defines a set of harmonious colors:

- **Primary (dark blue)** for structure and titles.
- **Alert (brick red)** for important warnings.
- **Example (dark cyan)** for illustrative content.

It also uses `newpxmath` for mathematical typography, e.g.,

$$\mathbb{E}[X] = \int_{\mathbb{R}} x \, dF(x), \quad \mathrm{Var}(Y) = \mathbb{E}[Y^2] - (\mathbb{E}[Y])^2.$$

Color Palette and Typography

This theme defines a set of harmonious colors:
- Primary (dark blue) for structure and titles.
- Alert (brick red) for important warnings.
- Example (dark cyan) for illustrative content.

It also uses newpxmath for mathematical typography, e.g.,

$$\mathbb{E}[X] = \int_{\mathbb{R}} x \, dF(x), \quad \mathrm{Var}(Y) = \mathbb{E}[Y^2] - (\mathbb{E}[Y])^2.$$

Block Environments

Three types of blocks are predefined:

Standard Block

This is a regular block with light blue background.

Block Environments

Standard Block
This is a regular block with light blue background.

Block Environments

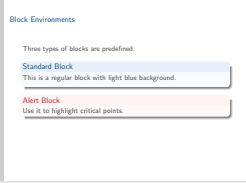
Three types of blocks are predefined:

Standard Block

This is a regular block with light blue background.

Alert Block

Use it to highlight critical points.



Block Environments

Three types of blocks are predefined:

Standard Block

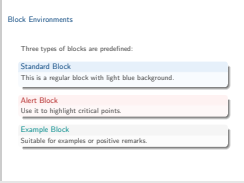
This is a regular block with light blue background.

Alert Block

Use it to highlight critical points.

Example Block

Suitable for examples or positive remarks.

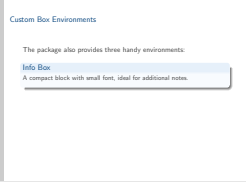


Custom Box Environments

The package also provides three handy environments:

Info Box

A compact block with small font, ideal for additional notes.



Custom Box Environments

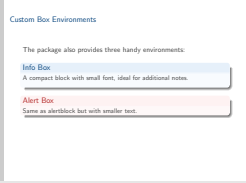
The package also provides three handy environments:

Info Box

A compact block with small font, ideal for additional notes.

Alert Box

Same as alertblock but with smaller text.



Custom Box Environments

The package also provides three handy environments:

Info Box

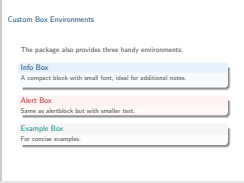
A compact block with small font, ideal for additional notes.

Alert Box

Same as alertblock but with smaller text.

Example Box

For concise examples.



Custom Box Environments
The package also provides three handy environments:
Info Box

Alert Box
Same as alertblock but with smaller text.
Example Box
For concise examples.

Theorem-like Environments

The style loads `amsthm` and defines several environments:

Theorem (Pythagorean Theorem)

In a right triangle, $a^2 + b^2 = c^2$.

Theorem-like Environments
The style loads amsthm and defines several environments:
Theorem (Pythagorean Theorem)
In a right triangle, $a^2 + b^2 = c^2$.

Theorem-like Environments

The style loads `amsthm` and defines several environments:

Theorem (Pythagorean Theorem)

In a right triangle, $a^2 + b^2 = c^2$.

Proof: *We leave it as an exercise to the reader.* □

Theorem-like Environments
The style loads amsthm and defines several environments:
Theorem (Pythagorean Theorem)
In a right triangle, $a^2 + b^2 = c^2$.
Proof: We leave it as an exercise to the reader. □

Theorem-like Environments

The style loads `amsthm` and defines several environments:

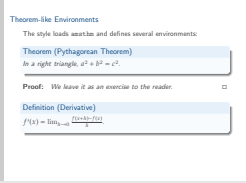
Theorem (Pythagorean Theorem)

In a right triangle, $a^2 + b^2 = c^2$.

Proof: *We leave it as an exercise to the reader.* □

Definition (Derivative)

$f'(x) = \lim_{h \to 0} \frac{f(x+h) - f(x)}{h}$.



Theorem-like Environments

The style loads `amsthm` and defines several environments:

Theorem (Pythagorean Theorem)

In a right triangle, $a^2 + b^2 = c^2$.

Proof: *We leave it as an exercise to the reader.* □

Definition (Derivative)

$f'(x) = \lim_{h \to 0} \frac{f(x+h) - f(x)}{h}$.

Remark

All environments follow the standard `amsthm` formatting.

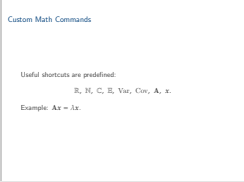
Theorem-like Environments
The style loads amsthm and defines several environments:
Theorem (Pythagorean Theorem)
In a right triangle, $a^2 + b^2 = c^2$.
Proof: We leave it as an exercise to the reader. □
Definition (Derivative)
$f'(x) = \lim_{h \to 0} \frac{f(x+h) - f(x)}{h}$.
Remark
All environments follow the standard amsthm formatting.

Custom Math Commands

Useful shortcuts are predefined:

$$\mathbb{R},\ \mathbb{N},\ \mathbb{C},\ \mathbb{E},\ \mathrm{Var},\ \mathrm{Cov},\ \mathbf{A},\ \boldsymbol{x}.$$

Example: $\mathbf{A}\boldsymbol{x} = \lambda \boldsymbol{x}$.

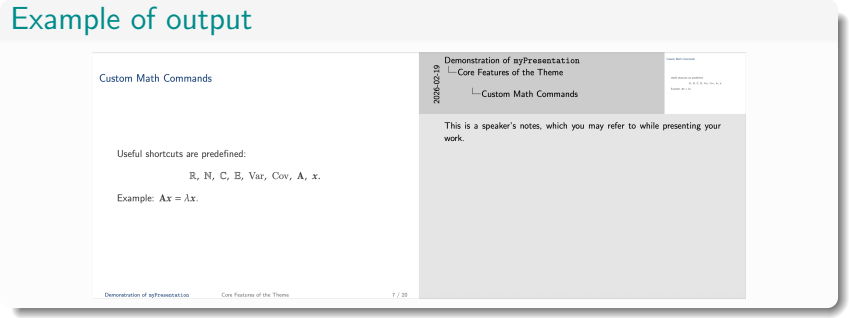


This is a speaker's notes, which you may refer to while presenting your work.

Notes and Annotations I

`myPresentation` is set to show the speaker's notes on the second screen.

Example of output



I recommend using **pympress** to play the pdf output.

Notes and Annotations II

Playing using pympress
